1 Introduction

Use this template as the starting point for technical reports. Set the metadata commands in the preamble (`\reporttitle`, `\reportdocnumber`, `\reportrevision`, ...) and the cover page, headers and footers update automatically.

1.1 Structure

A report typically contains: an executive summary, an introduction and scope, the technical body organised into sections, conclusions and recommendations, and references or appendices.

2 Formatting elements

2.1 Lists

- Bulleted items use the amber accent marker.
 - Keep each point concise and self-contained.
1. Numbered steps for procedures or ordered arguments.
 2. Second step.

2.2 Tables

Parameter	Value	Unit
DC voltage	525	kV
Rated power	3000	MW
Availability	99.9	%

2.3 Figures

Place figures in a local `figures/` folder and include them with `\includegraphics`. Captions are styled automatically.

3 Conclusions

Summarise the findings and state clear recommendations.
